

nova-Institute's Sustainability Department

Life Cycle and Sustainability Assessments

Use our knowledge and expertise in the area of bio- and CO₂-based materials and CO₂ fuels to your advantage!

Life Cycle Assessment (LCA) is the most reliable method to identify environmental issues within a process and verify claims of sustainability advantages. It identifies hot spots in processes, materials and products, providing a benchmark against which improvements can be measured. It provides transparent and reliable data in comparison to other products, enabling producers, providers and customers to make well informed decisions. Sustainability assessments go beyond classic life cycle assessments, for example, they integrate questions of safety as well as social and economic aspects.

Unique strengths of nova-Institute's LCAs

- Iterative approach with valuable learning outcomes for further process and product development
- Able to cover early stage production systems (low TRL) for optimization and continuous feedback loop within process scale (SUITED)
- Applying a wide range of methods suitable for the goal and scope of the specific process or product (system expansion, avoided burden and mass, energy, economic and RED/FQD allocation)
- Comprehensive sensitivity and uncertainty analysis incl. scenario analysis and Monte Carlo simulations.
- Professional presentation for optimal communication of the results: LCA can be a powerful communication tool to stakeholders
- Beyond sustainability: Comprehensive knowledge in the area of bio- and CO₂-based materials and fuels e.g. to optimize the raw material, technology, product strategy and to find the right partners

Our sustainability services in detail

- Tailor-made Life Cycle Assessments based on
 - ISO 14040:2006, ISO 14044:2006, ISO 14067:2013
 - ILCD handbook, JRC 2010, EUR 24708 EN
 - EN 16760:2015 Bio-based products - Life Cycle Assessment
 - Optional: GHG Protocol 2011 (WRI-WBCSD), PAS 2050:2011, BPX 30-323, Product Environmental Footprint (PEF) 2016
- Evaluation of sustainability, VDI guideline 4605, Oct. 2017
- Social Impact Assessment (SIA)
- Techno-Economic Evaluation (TEE) and Life Cycle Costing (LCC)
- Sustainability Integrated TEchnology Development (SUITED)
- Support in sustainability certifications and labelling

All services - LCA, TEE, LCC and SIA - from a single provider. Highly efficient, consistent and considering scenarios with all aspects of sustainability.

Our knowledge and expertise to your advantage

Comprehensive experience with LCA and Sustainability Assessments for bio- and CO₂-based chemicals and materials

nova experts have comprehensive experience in LCA, TEE/LCC, SIA and sustainability assessments on:

- Algae farming
- Bio- and CO₂-based products
- Biomass (first and second generation)
- Biorefineries
- Biotechnology
- Chemicals and building blocks
- CO₂ as feedstock (CCU)
- Food & feed, alternative proteins
- Fuels
- Natural fibres
- Polymers and plastics

Customers

- Several national and European research projects (more information www.nova-institut.eu/projects)
- Industrial customers and NGOs such as: BMW (DE), Colruyt (BE), Deloitte (NL), ESE Expert (DE), Evonik (DE), Ford (DE/US), KPMG (DE/NL), Logocos (DE), Porsche (DE), Reifenhäuser (DE), REWE (DE), Synvina (NL), Uhde-Inventa Fischer (DE), VW (DE), WWF (US).

Advanced research for your needs

You are looking for the right partners to establish a value chain? You think about alternative process routes for your product or raw materials? You need more information on your potential markets and customers? The political implications are not clear or you are looking for politically induced trends? You think about a sustainability communication strategy? We at nova are an interdisciplinary team including specialists in the fields "Technology & Markets", "Economy and Policy" and "Communication". Our expertise in the various fields guarantees you a comprehensive service that perfectly fits your needs.

Our expert team for you

Experts from the Sustainability Department

CEO

Dipl.-Phys. Michael Carus
+49 (0) 2233 48 14 - 40
michael.carus@nova-institut.de
Bio-based economy
Markets & marketing
Sustainability & policy

M.Sc. agr. econ. Elke Breitmayer
+49 (0) 2233 48 14 - 57
elke.breitmayer@nova-institut.de
Sustainability assessments
Techno-economic evaluation
Circular economy

M.Sc. Biotech. Niels de Beus
+49 (0) 2233 48 14 - 68
niels.debeus@nova-institut.de
System analysis & process modelling
Biotechnology
Sustainability assessments

Dr. chem. Ángel Puente
+49 (0) 2233 48 14 - 60
angel.puente@nova-institut.de
Sustainability assessments
Sustainable chemistry
Bio-based chemicals

M.Sc. Life cycle & sust. Andreas Scharf
+49 (0) 2233 48 14 - 61
andreas.scharf@nova-institut.de
Sustainability assessments
Life cycle assessments
Technology scouting

Dipl.-Ing. Env. Sc. Christopher vom Berg
+49 (0) 2233 48 14 - 61
christopher.vomberg@nova-institut.de
Policy & strategy
Sustainability assessments
Life cycle assessments

The sustainability department works in close cooperation with the nova department "Technology & Markets" for a deep understanding of the processes, with the nova department "Economy & Policy" for a deep understanding of the economic and political framework and with nova department "Communication" for an optimal communication of the results.

Technology & Markets

Dipl.-Biol. Achim Raschka
+49 (0) 2233 48 14 - 51
achim.raschka@nova-institut.de
Carbon Capture & Utilization (CCU)
Industrial Biotechnology
Bio-based chemicals

Dr. Pia Skoczinski
+49 (0) 2233 48 14 - 56
pia.skoczinski@nova-institut.de
Technology and Markets
Industrial Biotechnology
Carbon Capture and Utilization

M.Sc. chem. Ing. Raj Chinthapalli
+49 (0) 2233 48 14 - 48
raj.chinthapalli@nova-institut.de
Bio-based building blocks & polymers
Market research and analysis
Application assessment

Economy & Policy

M.A. Pol. Lara Dammer
+49 (0) 2233 48 14 - 55
lara.dammer@nova-institut.de
Policy
Labelling & certification
Sustainability

Dr. Sc. agr. Stephan Piotrowski
+49 (0) 2233 48 14 - 53
stephan.piotrowski@nova-institut.de
Techno-economic evaluation
Agricultural & forest feedstocks
Data collection and analysis

Communication

M.A. Geogr. Guido Müller
+49 (0) 2233 48 14 - 44
guido.mueller@nova-institut.de
Dissemination
Corporate communication
Marketing

nova-Institute is a private and independent research institute, founded in 1994; nova offers research and consultancy with a focus on bio-based and CO₂-based economy in the fields of food and feedstock, techno-economic evaluation, markets, sustainability, dissemination, B2B communication and policy. Every year nova organises several large conferences on these topics, nova has 30 employees and an annual turnover of more than 2.5 million €.
